SUMMARY

Motivated MSc Applied Cybersecurity student seeking an internship or entry-level SOC Analyst L1 role. Hands-on experience in Linux environments, log analysis, Wazuh, Wireshark, Cowrie honeypot, threat intelligence, and attack simulation. Currently pursuing TryHackMe Security Analyst Level 1 training with exposure to SIEM concepts, Splunk-based alert triage, incident investigation, phishing analysis, and escalation workflows. Strong interest in security monitoring, incident response, and SOC operations.

WORK EXPERIENCE

Data Analyst Intern | Lucy Switchgear FZE – JAFZA, Dubai, UAE

Aug 2024 - Jan 2025

- Automated the process of reporting breakdowns by creating a unified dashboard in PowerBI which tracks the machine breakdowns and provides data on the KPIs such as MTTR and MTBR.
- Developed macro-based user forms to reduce manual data entry time and improve operational efficiency.
- Supported maintenance data processes and assisted in closing Hazard Identification and Tracking (HIT) tickets.

Sales Intern | TLS IT Solutions – JLT, Dubai, UAE

Jun 2023 - Aug 2023

- Used targeted questioning techniques to determine customer needs and appropriate support.
- Handled inbound customer calls and responded to questions in a timely and professional manner.
- Achieved daily performance targets, aiding department progression towards sales goals.

EDUCATION

Master of Science in Applied Cybersecurity

Sep 2025 - Expected Nov 2026

Heriot-Watt University Dubai, UAE

Bachelor of Engineering in Computer Science

Sep 2021 - Jun 2025

Birla Institute of Technology and Science (BITS) - Dubai, UAE

TECHNICAL SKILLS

SOC & Security operations: SIEM Monitoring, Log Analysis, Alert Triage, Threat Detection, Honeypots, Incident Investigation, Attack Simulation, MITRE ATT&CK Basics

Tools & Platforms: Splunk, Wazuh, Wireshark, Cowrie, Linux, VirtualBox, VMware, Git, Prometheus, Snort

Investigation Skills: SSH Brute-Force Detection, Malware Download Attempt Analysis, Suspicious Command Review, IOC Identification

Networking: TCP/IP, DNS, HTTP, Firewalls, IDS/IPS Basics

Programming & Scripting: Python, Java, C, SQL, Bash

PROJECTS

Interactive Threat Intelligence Honeypot & Attack Simulation Lab

Mar 2026 - Apr 2026

- Deployed and configured a **Cowrie SSH honeypot** in a **virtualised Linux environment** to simulate real-world attacker **behaviour**.
- Demonstrated **SSH brute-force attacks, credential harvesting, post-exploitation activity, automated bot attacks, and malware download attempts**.
- Analyzed **captured logs**, attacker commands, and **intrusion patterns** to identify malicious intent and common attack behaviour.

SOC Alert Triage Lab - TryHackMe

In Progress

- Practiced basic **SIEM investigation** using Splunk search queries and **security event logs**.
- Reviewed alerts related to **brute-force attempts, suspicious logins, phishing indicators, and malware activity**.
- Used basic **SPL searches** to filter events, review timestamps, identify source IPs, and support **initial triage**.
- Followed **SOC-style investigation** steps to classify alerts and decide whether escalation is required.

LANGUAGES

English, Tamil, Hindi

CERTIFICATIONS

- TryHackMe – Security Analyst Level 1** — In Progress
 - Hands-on SOC training covering SIEM monitoring, Splunk alert triage, log investigation, phishing analysis, endpoint monitoring and incident escalation.
- Samsung Innovation Campus 2025** - Artificial Intelligence
- IBM Skillsbuild** - Cybersecurity Fundamentals
